

## Broadcasting Tip Sheet

# Importing Footage from Flip Video Cameras

1. Plug the Flip camera into the USB port on the keyboard.
2. Open **iMovie** from the Dock 
3. Create a new project (skip this step if you are already working on a project) – From the menu bar click **File > New Project**. Make sure to name your project clearly with the project name and your names (example: Video\_Scavenger\_Hunt\_Gonzalez\_Lewis).
4. From the menu bar go to **File > Import > Movies**
5. Under **Devices** in the top left corner, click **FLIPVIDEO > DCIM > 100VIDEO**
6. Select your clips from the list. Hold down the **Command** key  to select multiple clips.
7. Select **Create new Event** and give your event a name – label it clearly with the project name. (If you already have an event, choose **Add to Existing Event** and select your event.)
8. Click **Import**, be patient, and start editing!
